Postdoctoral Research Position in Natural Product Chemistry

Description

The Natural Products Discovery Groups (<http://npdg.ou.edu/>) at the University of Oklahoma is seeking applicants for a postdoctoral research position in natural product chemistry. Experience in the areas of secondary metabolite purification (HPLC and other chromatography methods) and structure determination (NMR and MS data interpretation) is required. Prior experience the areas of natural product semi-synthesis or chemical biology is desirable, but not essential. Applicants must have obtained their Ph.D. prior to the negotiated start date to be eligible for the position. Interested individuals should send a cover letter, CV, and the names and contact information for three individuals that will provide letters of recommendation. In the cover letter, applicants should include a discussion how they have or intend to promote diversity and equity as part of an inclusive research experience. Applicants will be evaluated based on the strength of their previous research experiences, quality of their publication records, and written statements. Applications will be evaluated as they are received and continue until the position is filled. Completed application packages and questions should be emailed to rhcichewicz@ou.edu. The Natural Products Discovery Groups is committed to diversity, equity, and inclusiveness in the academic community and sciences.
