POSTDOCTORAL POSITION

Description

The Baker at USF lab is recruiting for a postdoc position, preferably starting no later than late '20. The work will entail natural products drug discovery for infectious diseases (primarily fungal and bacterial but also parasitic and viral) using microbial and marine invertebrate chemodiversity sources with emphasis on innovating workflows with translational goals. Project aims include medicinal chemistry and de novo SAR/SPR. Candidates need not be trained in all aspects of the work but should be enthusiastic to learn. Willingness to participate in field work is a plus. Please email bjbaker@usf.edu with inquiries.
