Assistant or Associate Professor- The Ohio State University

Description

The Division of Medicinal Chemistry and Pharmacognosy in the College of Pharmacy at The Ohio State University (<https://pharmacy.osu.edu/medicinal-chemistry-pharmacognosy>) in collaboration with the Ohio State University Comprehensive Cancer Center (CCC) invites applications for full-time tenure track academic appointments at the level of Assistant or Associate Professor. We are looking for basic scientists with outstanding academic credentials, a strong record of scholarly productivity, and a demonstrated emphasis on cancer research. Areas of specialization could include drug discovery, synthetic medicinal chemistry, computational chemistry, screening of small molecules, or chemical biology, with clear relevance to cancer. The successful candidates will join faculty in the College of Pharmacy with broad interests in drug discovery and development, pharmaceuticals, and pharmacology and will be well positioned to collaborate with a wide array of cancer researchers within the OSU CCC and across the University. The Ohio State University is one of the largest public Universities with 200+ academic majors, strong programs in graduate education, and significant interdisciplinary interactions between the College of Pharmacy (<https://pharmacy.osu.edu/>) and all other colleges, especially the College of Medicine, College of Veterinary Medicine, the College of Arts and Sciences, and the College of Engineering. This is complemented by an exceptional Comprehensive Cancer Center (<https://cancer.osu.edu/>), which provides the infrastructure and the resources for strong interdisciplinary interactions with a focus on translation, in a collegial and supportive research environment. The CCC shared resources are state of the art and offer access to cutting-edge technologies (<https://cancer.osu.edu/for-cancer-researchers/resources-for-cancer-researchers/shared-resources>). In addition, 2019 marked the launch of The Pelotonia Institute for Immuno-Oncology (PIIO) (<https://cancer.osu.edu/piio>), a comprehensive research initiative with a \$100-plus million investment, and the Center for Cancer Engineering (CCE-CURES) (<https://cancer.osu.edu/for-cancer-researchers/research/research-institutes-and-centers/center-for-cancer-engineering>). The Ohio State University is located in Columbus, a vibrant, rapidly developing, and affordable city of almost one million, which has been recognized by Money Magazine as one of the "6 best big cities" in the US. Competitive start-up packages will be available to successful candidates to help them develop dynamic research programs. Additional funding is available through competitive, internal funding mechanisms administered by Pelotonia (<https://pelotonia.org/>), a grassroots annual bike ride that has raised over \$236 million for cancer research at OSU. Pelotonia also supports new core equipment and select programmatic research efforts. The Ohio State University is an Equal Opportunity/Affirmative Action Employer with a priority to increase diversity in the scientific workforce. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability status or protected veteran status. Applications should include a Letter of Interest, Curriculum Vitae, and Statement of Current and Future Research Plans, as well as the contact information of four academic references. For full consideration, applications should be received by September 15, 2022. Review of complete applications will continue until the positions are filled.

Hiring organization

The Ohio State University

Employment Type

Full-time

Job Location

Columbus, Ohio

Date posted

August 24, 2022

Valid through

15.09.2022

Responsibilities

Tenure faculty (regardless of rank) – persons with the titles of professor, associate professor, assistant professor and instructor who serve on appointments totaling 50% or more service to the university and who are eligible for tenure or who have obtained tenure. Duties and responsibilities are assigned in accordance with the workload guidelines laid out in the pattern of administration of each faculty member's tenure initiation unit (TIU) and, as appropriate, regional campus; obligations will include research, service and/or teaching or clinical practice. These faculty will have earned doctorate or other terminal degree in the relevant field of study or possession of equivalent experience.

Qualifications

The Ohio State University is an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation or gender identity, national origin, disability status, or protected veteran status. The university is committed to establishing a culturally and intellectually diverse work environment, encouraging all members of our learning community to reach their full potential. We are responsive to dual-career families and strongly promote work-life balance to support our community members through a suite of institutionalized policies and practices.
