

World Bank Ranking of Economic Units on 2018 Per Capita Income-

[← Country Classification](#)

For the current 2020 fiscal year, low-income economies are defined as those with a GNI per capita, calculated using the [World Bank Atlas method](#), of \$1,025 or less in 2018; lower middle-income economies are those with a GNI per capita between \$1,026 and \$3,995; upper middle-income economies are those with a GNI per capita between \$3,996 and \$12,375; high-income economies are those with a GNI per capita of \$12,376 or more.

Please note: Regions in this table include economies at all income levels. The term country, used interchangeably with economy, does not imply political independence but refers to any territory for which authorities report separate social or economic statistics. You can also download the [current classification by income in XLS format](#), the [historical classification by income in XLS format](#), and the [comparison with the previous fiscal year](#).
