Postdoc – Organic Synthesis

Description

The Pflug and Boyer labs in the Chemistry Department at SUNY ESF are seeking a highly motivated and independent postdoctoral researcher with expertise in organic synthesis to work on an exciting project in collaboration with the National Research Council Canada aiming at the development of certified reference materials of anatoxin-a and its congeners. The postdoctoral researcher will be responsible for the total synthesis of anatoxin-a and related congeners as well as expanding anatoxin-a monitoring methods to include these additional congeners. ESF is the premier US institution focused solely on the environment with excellent capabilities for state-of-the-art organic synthesis. Researchers have access to world-class facilities and instrumentation, including an analytical services complex that includes two new Orbitrap high-resolution mass spectrometers and 600- and 800-MHz nuclear magnetic resonance spectrometers. Note: The selected candidate must already have permission to work in the U.S. Application materials will not be accepted via email.

Responsibilities

- Total synthesis of anatoxin-a and related congeners
- Expansion of anatoxin-a monitoring methods to include these additional congeners
- Collect, prepare, and analyze experimental and spectroscopic data
- Write reports and scientific publications to be submitted to high-impact scientific journals
- Assist in supervising graduate and undergraduate students

Qualifications

- PhD Degree in Chemistry or a closely related field

Hiring organization

State University of New York –
College of Environmental Science
and Forestry (SUNY ESF)

Employment Type

Full-time

Job Location

Syracuse, NY

Date posted

December 6, 2023

Valid through

22.01.2024

- At least 3 years of demonstrable experience in organic synthesis
- Demonstrated experience in characterizing organic compounds by MS & NMR
- Ability to work independently in an exciting, high-paced environment and possess a strong passion for (and commitment to) interdisciplinary research
- Demonstrated experience in supervising undergraduate and/or graduate students
