Postdoctoral fellowship

Description

Applications are invited for a NIH-funded Postdoctoral fellowship Institutional Training Grant entitled "Training in Botanical Approaches to Combat Metabolic Syndrome". Seeking PhD with biomedical research experience who is interested in conducting research into the use of botanicals to prevent and treat metabolic syndrome. Evidence of productive research experience and skills in scientific writing are highly desirable. Fellowship provides up to three years of funding for training in lab skills and coursework necessary for establishing an independent research career. The candidate will work at Rutgers University under the guidance of Dr. Ilya Raskin (<https://sites.rutgers.edu/ilya-raskin-lab/>) in partnership with Pennington Biomedical Research Center of Louisiana State University. The successful applicant will join a well-established, diverse, and collaborative research team, and have access to the resources of two major research universities. Candidate must be a US citizen or green card holder.
