## Postdoctoral Researcher in Pharmacognosy (two years)

### Description

Do you want to work with research, supported by competent and friendly colleagues in an international environment? Are you looking for an employer committed to sustainable employment practices and offering secure and favorable working conditions? Welcome to apply for a position as a Postdoctoral Researcher at the Department of Pharmaceutical Biosciences at Uppsala University. With laboratories in the heart of Uppsala Biomedical Center and Sweden's only Faculty of Pharmacy, we are a vital engine in the development of education and research in the pharmaceutical sciences. More information about the department and its activities is available at [www.farmbio.uu.se](http://www.farmbio.uu.se). The employment is a temporary, full time position of 2 years according to central collective agreement. For further information about the position, please contact: Associate Professor Luke Robertson e-mail: [Luke.Robertson@uu.se](mailto:Luke.Robertson@uu.se) . For questions about the employment, contact Administrative Manager Marina Rönngren, e-mail: [marina.ronngren@uu.se](mailto:marina.ronngren@uu.se). Please submit your application by 11 november, 2025, UFV-PA 2025/3061

### Responsibilities

Duties (1) Independently conduct research in natural products chemistry (2) Isolate and structurally characterize bioactive compounds (3) Contribute to method development in the analysis of natural products (4) Publish research results in international scientific journals. As a postdoc, you are expected to take a leading role in the entire research process—from research planning and project administration, data processing and analysis, to interpretation and dissemination of research results.

### Qualifications

Requirements (1) PhD degree in pharmacognosy, natural

### Hiring organization

Uppsala University

### Employment Type

Full-time

### Job Location

Uppsala

### Date posted

October 20, 2025

### Valid through

11.11.2025

products chemistry, or related field, or a foreign degree deemed equivalent to a doctoral degree in the specified field. The degree must be completed no later than the time of the employment decision. Preferably, the degree should have been obtained within the last three years. The starting point for calculating the three-year timeframe is the final application deadline. In special cases, such a degree may have been obtained earlier, with special reasons including leave due to illness, parental leave, union-related trust assignments, etc. (2) Documented laboratory experience in the isolation and/or structural elucidation of natural products (MS, NMR, HPLC) (3) Documented experience working with microbiological techniques (4) Strong scientific publication record (5) Excellent communication skills in written and spoken English, as well as good documentation skills. We are looking for a creative, meticulous, and well-organized candidate. Great emphasis will be placed on your ability to work independently, collaborate with others, and contribute to a dynamic research environment.
