Sr. Stability Coordinator, Quality

Description

The role:

The Sr. Stability Coordinator will be responsible for implementing and leading the corporate stability process for Dietary Supplement, Food and Personal Care Products. The Sr. Coordinator will review and edit stability protocols and stability reports and organize corporate stability data. This role will review stability requirements, review internal protocols designed to test the stability of Herbalife products, review analytical data generated during stability studies, and review internal reports that detail the stability evaluation and compliance of Herbalife formulas.

→†

How you would contribute:

- Generate stability protocols and reports, data review and trend evaluation, and address compliance challenges related to stability.
- Evaluate the QC test methods and acceptance criteria used in all stability testing and recommend changes where appropriate.
- Interface with Quality, R&D, and Licensing partners to understand specifications and how to interpret results.
- Identify key formatting requirements. ensuring accurate content, cross-checking with interdisciplinary teams to ensure compliance, and following up with development partners to understand how to take care of non-compliant issues that are encountered.
- Analyze existing data to generate reports in a manner consistent with Herbalife standards.
- Collaborate with Stability Manager in creating stability reports using pre-defined templates and pre-existing data.
- Confer with interdisciplinary team to understand how to take care of products that don't enforce to specification limits and proactively work to resolve these issues.
- When required, work with partners in Quality to get additional samples and/or perform follow-up testing to validate questionable results.
- Participate in the biweekly stability protocol review meetings.
- Coordinate with Herbalife's contract manufacturers to acquire products for stability studies.
- Interpret data to determine if further testing is required.
- Ensure that the samples are analyzed, and the data is reported in a timely manner.
- Assist in audit and compliance program to meet ISO17025 laboratory accreditation requirements, including statistical analysis of data.
- Perform additional duties as assigned
